

# G12-60S Special Edition

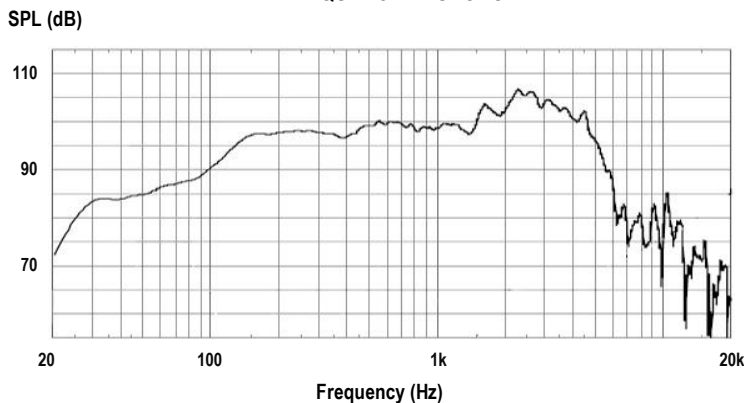

Built to meet the demands of high gain amplifiers, the G12-60S is a modern guitar speaker that combines a generous level of power handling with an instantly recognisable Celestion tone.

With the ability to handle massive overdrive sounds with ease, the G12-60S delivers a huge bass response with an intricate mid-range and detailed highs. Clean tones are expressive, without ever being harsh; crank it up to deliver the kind of snarl that comes from raw rock power.

## GENERAL SPECIFICATIONS

Nominal diameter .....	305mm/12in
Power handling .....	60W
Nominal impedance .....	16 $\Omega$
Sensitivity .....	100dB
Chassis type .....	Pressed Steel
Voice coil diameter.....	44mm/1.75in
Voice coil material .....	Copper
Magnet type .....	Ceramic
Magnet weight .....	1.4kg/50oz
Frequency range .....	70Hz-5000Hz
Resonance frequency.....	70Hz
DC Resistance, Re .....	12.29 $\Omega$

## FREQUENCY RESPONSE

## MOUNTING INFORMATION

Overall diameter .....	309mm/12.2in
Overall depth .....	135mm/5.3in
Magnet structure diameter.....	156mm/6.1in
Cut-out diameter .....	283mm/11.1in
Mounting slot dimensions.....	$\varnothing$ 7.9mm/0.31in
Number of mounting slots .....	4
Mounting slot PCD.....	297mm/11.7in
Unit Weight.....	4.6kg/10.1lb
